NORWECO SINGULAIR
Initial Service Contract

Owners Name: _____
Address: _____ **Effective Date:** _____ **Per final inspection**
Street
 _____ **Expiration Date:** _____
City **State** **Zip**
Telephone No: _____ **System Installed On:** _____
Directions: _____

This initial two year service contract for the Singulair Bio-Kinetic wastewater treatment system located at the site described above is intended to enable the owner to economically obtain regular service inspections for the Singulair unit, as well as non-scheduled or special service that may be required by a qualified technician. When this contract is in force, the owner will not be charged for any routine service labor. Under the terms of this service agreement, a technician will regularly inspect, test, and report the plant at four month intervals. The site will be visited following each special owner service request within a 48-hour period. The contract shall remain in effect for a period of two years, as specified in the effective and expiration dates listed above. All components of the Singulair unit are covered for a full two years warranty as determined by the dates above. The components include: concrete tanks, aerator, discharge pump, all electrical components installed as part of the system, filter / chlorination assembly, sprinkler heads, and piping. This service contract does not include the pipe from the structure to the tanks or any necessary sludge pumping that may need to occur. It shall also be understood that the homeowner is responsible for maintaining the chlorine in the system. The Texas Commission on Environmental Quality rules requires a service policy to be in effect at all times or the on-site sewage facility permit is considered void. All commercial systems will have a BOD and TSS test performed annually. Additional charges will be billed to the owner for the BOD and TSS test. The homeowner agrees to provide Hurt's Wastewater Management Ltd. with all gate combinations, keys, etc. to gain access to the system for the purpose of conducting routine inspections or service calls and to immediately notify with any changes and provide the new combinations or keys.

VIOLATION OF WARRANTY includes shutting off the electric current to the system for more than twenty-four hours, disconnecting the alarm system, restricting ventilation to the aerator, overloading the system above its rated capacity, or introducing excessive amounts of harmful matter into the system, or any other form of unusual abuse.

AFFIDAVIT

THE COUNTY OF _____
STATE OF TEXAS

According to Texas Commission on Environmental Quality Rules for On-Site Sewage Facilities, this document is filed in the Deed Records of _____ County, Texas.

I

The Texas Health and Safety Code, Chapter 366 authorizes the Texas Commission on Environmental Quality (TCEQ) to regulate on-site sewage facilities (OSSFs). Additionally, the Texas Water Code (TWC), §5.012 and §5.013, gives the TCEQ primary responsibility for implementing the laws of the State of Texas relating to water and adopting rules necessary to carry out its powers and duties under the TWC. The TCEQ, under the authority of the TWC and the Texas Health and Safety Code, requires owners to provide notice to the public that certain types of OSSFs are located on specific pieces of property. To achieve this notice, the TCEQ requires a recorded affidavit. Additionally, the owner must provide proof of the recording to the OSSF permitting authority. This recorded affidavit is not a representation or warranty by the TCEQ of the suitability of this OSSF, nor does it constitute any guarantee by the TCEQ that the appropriate OSSF was installed.

II

An OSSF requiring a maintenance contract, according to 30 Texas Administrative Code §285.91(12) will be installed on the property described as (insert legal description) _____

The property is owned by (insert owner(s) full name) _____

This OSSF shall be covered by a continuous service policy for the first two years. After the initial two-year service policy, the owner of an aerobic treatment system for a single family residence shall either obtain a maintenance contract within 30 days or maintain the system personally (when the permitting authority allows). As per §285.7(d)(4)(B) An owner may not maintain an OSSF under the provisions of this section for commercial, speculative residential, or multifamily property.

If applicable, applicant agrees that, in the event of sale of property, the properties above will be sold together as one. If the properties are to be sold separately, the existing on-site sewage facility which shares both properties must be dismantled. Permits for the alteration of the on-site sewage facility may be required. Planning materials for existing, permitted, on-site sewage facilities are available with the authorized agent.

Upon sale or transfer of the above-described property, the permit for the OSSF shall be transferred to the buyer or new owner. A copy of the planning materials for the OSSF can be obtained from (insert permitting authority) _____.

Installation Contract

Installation Prices: Include appropriate trash and pump tank sizes.

- ___ 600 gpd Norweco Aerobic Unit
- ___ 750 gpd Norweco Aerobic Unit
- ___ 1000 gpd Norweco Aerobic Unit
- ___ 1500 gpd Norweco Aerobic Unit

Site evaluation / Design / Permit: Total _____ (Good for 60 days)

- **This is a dry bid only.** In the event the job site is not accessible due to the weather conditions, there will be an additional charge to mud the system in (either use of track hoe to dig and set tanks or use of mats to drive truck in). Additional amount charged is subject to severity of location.
- The above prices are based on the home having one stub out and the tanks being located within 15' of the stub out. If there is more than one stub out, there will be an additional charge per stub out to connect the pipe. In the event of multiple stub outs and the stub out being positioned such as to require the installation of a lift station, there will be additional charges.
- An additional charge of \$250.00 for Risers will be added if stub outs are more than 24"
- **Owner's electrician is responsible for bringing 30amp 110 circuit (for 600 gpd only) within 5' of stub out.** Hurt's will provide 15' of electrical, however extra wire and conduit will be an additional charge.
- **Excess dirt will be left stockpiled on job site.**
- **Hurt's will not be responsible for damaging any unmarked underground lines.**
- **Homeowner or Builder** is responsible for water supply to fill tanks, as well as the removal and/or replacement of fences or structures.
- **Hurt's not responsible for back filling around tanks after dirt settles.** One load of sand provided by Hurt's to be used for 4" pad under tanks and filling around 4" pipe from house.
- **Payment in full required day of installation. Contract is with Hurt's and homeowner. If payment is coming from the builder, the homeowner is responsible for making sure Hurt's receives that payment.**
Visa / MasterCard / accepted at Hurt's office only. If used, there will be an additional charge.
